RESISTANCE TO CARE IN DEMENTIA

What is resistance to care?
• Not want to eat or drink
• Not want to wash or change clothes
• Stay in bed too much
• Spit out food or medicine
• Walk away from help
• Shout at you or push you away when you try to help

Why does it happen?
• Dementia
• Pain
• Sick or infection
• Toilet problems
• Tired
• Don’t understand what you are doing
• Feel shame when you try to help

What could help?
• Keep respect
• Know their story
• Go to clinic for check up
• Keep to their usual routine
• Let them do what they can for themselves
• Tell them what you are going to do to help
• Yarning with family and community
• Go back to Country
