**Evidence to practice: Knowledge translation in action**

**Workshop overview:**
Knowledge Translation (KT) is the process whereby new knowledge such as evidence from research and clinical expertise, is translated into a format that can be utilised by the receiver (e.g. clinicians, health organisations, aged care providers) to implement a change in practice that will address an identified problem or need. This workshop aims to provide participants with a foundation knowledge of KT and the processes that can be used to effectively move evidence into practice. Attendees will have opportunities to learn from the examples of others who have successfully planned and implemented evidence into practice, and to apply this to real world examples in the development of a KT plan.

**Program**

**Session 1: What is knowledge translation?**

*Professor Belinda Goodenough, Dementia Training Australia*

**Session 2: The practicalities of knowledge translation**

*Assoc Professor Sally Bennett, University of Queensland*
*Professor Yun-Hee Jeon, University of Sydney*
*Dr Tom Morris, The Dementia Centre, HammondCare*

**Session 3: Knowledge translation planning and modelling**

*Ms Jennifer Thompson, Cognitive Decline Partnership Centre, University of Sydney*

**Session 4: End of grant knowledge translation planning**

*Ms Kim Burns, Dr Margie MacAndrew and Dr Lidan Zheng*

---

**Event Details**

**Cost:** Free to attend, funded by the Australian Government

**Date:** Monday 4th November 2019

**Time:** 1 - 5pm AEST

**Venue:** NeuRA Theatre Level 3
John & Betty Lynch Seminar Room
Margaret Ainsworth Building
139 Barker Street, Randwick

**Who should attend?**
Researchers, academics and health professionals working with people living with dementia

**Registration is essential**

**Contact:**
