

APATHY IN DEMENTIA

What is apathy?

- No interest in doing things
- Sit for a long time doing nothing
- Don't start yarning
- Can't start doing things without help
- No interest in family and community

Why does it happen?

- Dementia
- Pain
- Sick or infection
- Bored, not enough to do
- Alone too much

What could help?

- Keep respect
- Know their story
- Go to clinic for check up
- Walk and yarn with them
- Help them do things they like and know well
- Help them to be involved in community
- Go back to Country
- Help them start again when they stop doing something
